

TIGMASTER®

MADE IN USA

QUICK CHUCKS

- Simple, quick and easy.
- No more stripped torch body threads.
- No more searching for collets or collet bodies.

Quick Chuck allows simple and quick electrode changing or adjusting. Simply push in the rear rubber knob with your thumb and the electrode is free to be removed or adjusted.

Once the electrode is removed, the chuck easily pulls out of the torch body and a different size chuck and electrode can be inserted into the same chuck body.
