4	4501 3 Flint Lighters (10 pces)
5	5021X 3 Flint Renewal
6	5021 3 Flint Lighter w/ 4 Flint Renewals

Made in U.S.A

The #3001's flint tip may be easily replaced with one of our Universal Single Flint Renewals. The #3001 features a round file made with our secret SHURLITE process, a large square hood for trapping flammable gases for easy ignition, and a wire frame made from a specialty steel which retains it's springiness over the life of the lighter.

The SHURLITE #4501 is the spark lighter that's built to withstand the harshest of conditions. It's the toughest spark lighter made and it's designed for the toughest jobs. The #4501 will easily light any flammable gas. It is manufactured of heavy, high tensile strength steels, plated and galvanized. This lighter is the favourite of the heavy construction and petroleum industries. Like all SHURLITE lighters, the #4501 is guaranteed to spark vigorously and reliably.
