

Handheld Edge Milling Machine

PB-15 applies to preparation before plate welding,

The machine equipped with continuous bevel width adjustment, overheating protection and electric speed control for use on various material.

The compact design makes it an excellent tool in narrow space .

The multifunction and flexibility can improve efficiency and make the machine become an attractive machine.

Part Number	Description
PB15	Plate Beveler

Power supply	220-240V 1PH 50/60HZ
Motor Power	2200W
Spindle Speed	6600RPM
Feed Speed	1-10 M/Min
Beveling Width	1-18mm
Radius Dimension	R2, R3
Beveling Angle	20, 30, 35,37.5, 45, 55 and 60 deg.
Minimal plate thickness	1.5 mm
Minimal inner radius	25 mm
Weight	8.5 kgs
Inserts Qty	4 or 5 pcs
