

# TUBE & PIPE NOTCHER

Notching a round, or square tube or pipe has never been easier. Do quick and consistent notches on straight, angled and curved tubes with complex angles.

The new BuildPro® Tube & Pipe Notcher makes alignment and length control of the notch easy!

## Specifications / Features:

- 0-90° adjustable angle setting with easy-to-read degree scale.
- Heavy duty, all steel construction, with the same 5/8" thick steel used for the BuildPro Tables.
- 25mm Steel Shaft with Double Heavy-Duty Needle Bearings.

Requires a powerful (cordless drill not recommended) 1/2" drive drill motor

Hole Saws: 3/4" – 2.5" diameter Hole Saws.

\*\*\*It will fit a 3.5" hole saw, but the range of angles might be slightly limited at 3" & above: 0-20°.

Hole Saw mounting: Accepts hole saws with either 1/2" x 20 or 5/8" x 18 threads.

\*\*\*Does not use the mandrels or pilot drill bits generally included with hole saw kits.

V-Blocks are aluminum with rounded edges and finished surfaces to create a non-marring, "soft" face.

Extremely easy to mount, adjust, and use.
