

TIGMASTER[®]

HIGH PERFORMANCE TIG WELDING TORCHES

The new Speedway Series torches bring together the best in design, materials and workmanship to give today's professional TIG welder the features to achieve unprecedented weld results.

Features

- Silver brazed copper construction
- High temperature silicone rubber
- Over braided rubber hoses and power cables
- Speed nut hose connections
- Speed bump ergonomic handle
- Speed angle torch body

Silver brazed copper construction - which increases electrical current capacity and dissipates heat most efficiently giving long trouble free performance.

Resilient high temperature silicone rubber - insulation with high dielectric properties prevent "HF" current leakage and resists chipping, cracking and withstands temperatures to 500°F.

Flexible over braided rubber hoses and power cables - provides flexibility and manoeuvrability not available with traditional vinyl tube materials. This is especially helpful in cold environments.

Large tin plated copper conductors resist corrosion and have greater current carrying capacity than twin cable assemblies.

Speed Nut hose connections - mean no more troublesome wire clamps. No tools or special hose assemblies required. Repairs or replacements are quick and simple with these positive finger nut connections.

Speed Bump ergonomic handle - shape lays comfortably in the welders hand. The handle rotates 360° for the optimum position to allow long work cycles without tiring. The built-in retaining lip keeps the cable cover neatly and securely in place.

Speed Angle off set torch body - allows the welder access to difficult weld locations yet remains comfortable to hold. Quality construction, modern design and materials while retaining the use of industry standard head parts such as collets, collet bodies, gas lenses, back caps and nozzles. This interchangeability keeps costs low and accessories readily available to keep these torches working for years to come.

SW-320 & SW320SA Deluxe Torch Package Includes:

Torch body, handle, over braided rubber hoses and power cable assembly, premium leather cable cover, 3/32 x 7" tungsten electrode, all back cap

SW-450 Deluxe Torch Package Includes:

Torch body, handle, over braided rubber hoses and power cable assembly, premium leather cable cover, 1/8" collet and collet body, #8 alumina nozzle, 1/8" x 7" tungsten electrode, both back caps.

OPTIONAL ACCESSORY KIT

AK-320 Deluxe Accessory Kit

For SW-320 Model	Contains 1 Each.
Collets:	1/16", 3/32", 1/8"
Collet Bodies:	1/16", 3/32", 1/8"
Gas Lenses:	1/16", 3/32", 1/8"
Back Caps:	Medium, Short
Alumina Nozzles:	#5, #6
Alum. Gas Lens Nozzles:	#6, #7
Tungsten Electrodes:	1/16", 3/32", 1/8" x 7"
