

# EZ ZONE TAPE

**EZ Zone Tape prevents weld contamination when sealing the root gap between pipes to retain Argon gas.**

- Eliminates worry of adhesive contaminating the weld area when sealing the root gap between pipes because its composed of two outside adhesive sections separated by an adhesive-free centre zone.
- Only the adhesive-free zone is placed over the weld, therefore the adhesive never comes in contact with the pipe as it is welded.
- The zone acts as a centering guide, making correct placement of tape and ensuring no adhesive contamination.
- EZ Zone Tape is free of halogens including fluoride, chloride, and bromide as well as chlorofluorocarbons.
- Adhesive portion of aluminium tape withstands temperatures of up to 260°C.
- Aluminium foil portion of tape withstands temperatures up to 593°C.

Part Number	Description
EZ-ZT2.5	Aluminium Purge Zone Tape 63 mm x 23 m
EZ-ZT4.0	Aluminium Purge Zone Tape 101 mm x 23 m
