

Aluminium Adjustable Pipe Clamp

The Adjustable Pipe Clamp is manufactured using lightweight aluminium. The pipe alignment V's are cast into the clamp and precisely machined, assuring perfect alignment of pipe ends.

The clamp is lightweight (7.4 kgs. net) and portable. A convenient carrying handle has been cast into the pipe clamp, allowing easy, safe transportation to any job site. One person can position the clamp and start welding in about two minutes for most applications and pipe sizes.

WARNING: This clamp is designed to assist in aligning two pipe ends for welding. Do not use this clamp for lifting or supporting pipe.

Part Number	Description
APC16A	Pipe Clamp with Adjustable Chain

Banana Wedge

Banana Wedges are made of forged Carbon Steel for durability and designed to facilitate the separation of pipe flanges. Two opposing wedges are driven together, forcing flanges to separate.

Blade Height: 21 mm
Blade Width: 21 mm
Blade Length: 305 mm
Weight: 0.68 kgs

Part Number	Description
PBW	Pipe Wedge Banana

**Sold separately*

Spacing Wedge

Spacing Wedges are manufactured of high-grade carbon steel, precision-ground and heat-treated. Available in two sizes they accommodate small-to large-diameter pipe.

Small wedge 19 mm x 101 mm x 4.7 mm
Large pipe wedge 44 mm x 222 mm x 6 mm

Part Number	Description
PWS	Pipe Wedge Short
PWL	Pipe Wedge Long
