MIG GUNS 180 TO 600 AMPS 3M TO 7.5M

- Optimum Torch Cooling
- Robust Construction & Durability Extends Torch Life

Conductor tubes available in 45, 60 and 180 degree. Flexi necks to suit most models. Gooseneck extensions available. Special goosenecks made upon request.

Mig Gun handles are made of a high heat resistant nylon with fibre glass. "Smallest 400amp Tweco style mig gun handle on the market" plus slim line series available.

All Profax guns have adaptable backends, fit most brand mig machines. Superior fitting of the copper cable to front and rear adaptor. Eliminates the use of expensive adaptors. Standard "Tweco", Lincoln, Miller and Euro.

Totally rebuildable front and back ends - easy servicing.

- AMT machine torches
- IMT-250 internal torches

Progressive spring strain relief instead of the rubber hose cable assembly support. The rubber supports have a tendency to split which may allow the mig wire to crimp and create problems with the wire feeding.

Profax Quality Consumables
Standard "Tweco" type, heavy duty series and Bernard type

Standard "Tweco" type

Bernard type

Heavy Duty series

Mig Guns have four trigger leads (two spares). Contains more copper in the cable providing better efficiency. Outer casing of cable is rubber with cross polymers prevents "running" when pricked or cut.
