

PROGRESS HOLDER

Recognized worldwide for the special design of the head. When changing electrodes no live (metal) parts are exposed. The fiber-reinforced head and handle assure a very high impact resistance. A perfect example of an improved design offering increased durability. Progress is available in two types - 400 and 600 amp.

Vlamboog electrode holders are made of high alloy brass and heat resistant, reinforced polyester or fiberglass.

They have a stainless steel spring and all parts are available as spares.

All types have a duty cycle of 60% up to the 400 version. All holders are compliant with the EN 60974-11 standard.

Part No	Description
V010341100	Electrode Progress Holder 400-1
V010360100	Electrode Progress Holder 600-1

OPTIMUS HOLDER

Optimus is a high quality electrode holder, with a closed head. The wide range of welding applications, optimal insulation and powerful grip on the electrodes have made Optimus a well known and reliable welding tool around the globe.

The Optimus can be used also for overhead welding.

The cooling ribs in the handle allows maximum cooling and grip comfort. Electrodes can be inserted a variety of positions.

Part No	Description	Electrode	Cable
V010130100	Optimus 300	1.6 - 6.3 mm	25 - 70 mm ²
V010140100	Optimus 400	2.5 - 8.0 mm	25 - 95 mm ²
V010150100	Optimus 500	2.5 - 8.0 mm	25 - 95 mm ²
V010160200	Optimus 600	2.5 - 8.0 mm	25 - 95 mm ²
