

## WELD GAS ANALYSERS

The Ar-Gone Weld Gas Analyser accurately monitor and measures oxygen levels during TIG Welding.

### ARGONE WELD GAS ANALYSER

- Accurately displays oxygen content from 20.90% - 0.01%.
- Easy operation & light weight.
- Ideal for on site use.
- Quick response to changes in oxygen levels.
- Kit includes: case, lanyard, flow adaptor, aspirator bulb, 2 m rubber hose & steel probe, manual & calibration certificates.
- 12 months warranty.

TMWGA0001	Weld Gas Analyser Ar-Gone

### SELF CALIBRATING ARGON ANALYSER

- Self calibrating on start up.
- Improved electronics for faster response.
- New style, improved sensor.
- Range 20.94 down to 00.01.
- Robust weather resistant case.
