

WELDERS

WINDSHIELD

- Reduce arc flash and porosity occurrences
 - Steady rest support
- Will hold firmly to any flat workpiece

Part No	Description
WW-1	Welders Windshield

Designed and engineered from 16 gauge carbon steel. The product is then powder coated with black crinkle finish to reduce glare. With two 60 pound pull magnets on opposing corners the WW-1 will hold firmly to any flat workpiece of ferrous materials. Overall dimensions are 851 x 178 x 101 mm and only weighing only 2.5 pounds fully assembled.

Overcome the elements and weld outside without too much set up or breakdown time. Reduce arc flash and porosity occurrences, when multiple operations are working in tight quarters of one another. Steady rest support for operators hands and arms, allowing constant standoff from work while reducing operator fatigue.
